

**QOPI® Certification Application Fees for Practices Outside the United States**

For QOPI® Certification, cost is determined by the number of physicians\* (defined below) at a participating practice, plus a fee based on the number of practice locations that administer antineoplastic therapy. For applicants outside of the United States, there are additional fees that are country dependent. The applicant practice is responsible for the costs of the On-Site Survey including flight fees, hotels, and ground expenses for up to 2 ASCO representatives. Additional fees for legal review may be assessed for applicants outside of the United States. Payment should only be sent after staff approval in the QCP Application, and the invoice is generated. Each application fee covers the duration of the 3-year Certification term (if Certification is awarded). Application fees are non-refundable.

*\*Physician calculation: the number of physicians is determined by a unique count of the following physicians (without proration) who prescribe antineoplastic therapies including oral oncolytic therapies for the treatment of a cancer diagnosis: Hematology, Hematology/Oncology, and Medical Oncology physicians, Gynecologic Oncology physicians, and physicians of other specialties.*
